

PROGRAMMING

MEDICATION POLICY

Created: 2017 | Revised: September 2022

GENERAL POLICY

For the safety of all youth attending a Fed event, we require that participants turn over their medication to the designated adult support or staff member (youth will be told who will hold their medication at the event).

POLICY & PROCEDURE DETAILS

The medication staff will hold all youth participants' medication in a locked bag and will make it available for participants as they need it.

Medication must be turned over to medication staff as soon as you arrive at the designated meeting location or the event location.

- This includes all prescription and non-prescription (Tylenol, Advil, Midol, Gravol, etc.) medications
- All medications must be in their original packaging or blister packs
- Prescription medications must have a label with the youth's name and dosage
- The only medication youth do not need to turn in is birth control.

It is the youth's responsibility to take their medication on time as prescribed and that they will only be reminded once by the medication staff.

- Youth will be asked to sign a medication form each time they request access to their medication

It is the youth's responsibility to pick up remaining medication or medication containers at the end of the event.

Fed staff cannot provide any non-prescription medications (Tylenol, Gravol, etc.) to youth, although youth may bring their own, give it to the medication staff for safekeeping, and access it as needed.
